All Quiet.

The past ten days have probably been the quietest this city ever saw, since she has worn municipal honors. There have been only about three or four arrests, and these for trivial offences. On Sunday there was no disturbances, and no arrests, nor were there any yesterday. It looks like the millenium to the police, no doubt, but they prefer a little excitement. The city, in all respects, has been dull and devoid of any excitements, much to the vexation of reporters, who have to search with microscopic eye for a bit

Rev. J. M. Atkinson, D. D.

This excellent and able minister on Sunday afternoon spoke on one of the vices which is, perhaps, the greatest, drunkenness. His remarks were more particularly addressed to the members of the General Assembly, numbers of whom were present. He said that the traffic in liquors was a thing which the Legislature should either break up, or else so tax it as to make an immense source of revenue, and thus put such a pressure on it as to crush it. The discourse was pungent and vigorous, and evidently made

an impression.

Progress of the Work---The Building-The Great Prison Wall,

A reporter, on visiting this institution a day or two since, was struck with the progress of the work, both on the buildings and the wall. In the rear of the main building, with its cells, has risen what is called the domestic department, an immense structure 175 feet long and from 32 to 70 feet wide, and two stories high. In this are to be done the cooking and washing, on the basement, while on the second floor are the laundry, store and clothes rooms, drying room etc. The engines are also in this building. In the third story are the dormitories, where all the domestics of the prison will be quartered. This building, which is of brick, and handsome in design, is almost complette. In the rear of this rises the branch of the prison buildings wherein are the strong cells. These are 64 in number, and isolated. The authorities say that the plan of keeping prisoners thus separate from the main body has the best effect in subduing them. Like the outside world, they pine for society. The building in front, which contains the cells, what is known as the main prison, will contain 800 cells. Half of these are constructed. The completed portion is 5 stories, or tiers of cells, high and is of brick, stone and iron, well built throughout. There are guard rooms and all the windows and doors are heavily grated. The cells are about 7 feet high, 8 feet ong and 5 feet wide, and will be thoroughly warmed and ventilated by a building. The wall is complete for repeal of the 10 per cent. tax on about a hundred feet and with its pro- banks. jecting coping, which on top forms a walk for the guards, is convict proof. When the wall is finished, a guard tower will stand at each end. Then four men can guard the prison at a time. Work on this rear wall goes on rapidly, and it will be completed in a few months, the most difficult and heavy mason work being finished already. The convicts grow restive as they see the great wall rising and the officials have to be very vigilant. The wall will be finished first, and then and sent to the House of Representawork will commence on the main building. This was intended to be of stone, but Superintendant Hicks excure. The brick for all the work are made now in the enclosure, and sound ones they are. The clay comes from

Walnut creek. The great stone quarry, already down to an immense depth, is being fully developed, and some fine. though very bard, stone is taken out. The waste rock is used to build walls around the great cavity, so as to turn off the surface water. The idea is to use the quarry, when work in it is stopped, as a grand reservoir wherin the water from a fine spring will flow, and also pure rain water accumulate. Then it will supply both the penitentiary and the insane asylum with pure water at all times, as it will hold 1,000,000 gallons, and be some 50 feet deep, a regular lake, in fact. The portion of the grounds by the lake, outon the building is a credit to the Su-

side the wall, is to be carefully graded and a lake put around it. The work perintendent and his assistants, and is both neat and durable. The health of the prisoners was never better than a present, and everything seems to be going on very smoothly. The officials speak of the influence exerted by the

Sunday services, which are a means of great good. Testing Hose. The Rescue steamer yesterday tested the 1000 feet of new rubber hose, just bought by the city. The steamer was at one of the capitol cisterns, and ran the line of hose down Fayetteville street. The first test was with 1000 feet. With 140 pounds pressure a oneinch stream was thrown 100 feet in height. Then more hose was added until 1800 feet was stretched, reaching

from the capitol to Davie street. With ried by a vote of 36 to 10. a pressure of but little more than 100 pounds a stream was thrown 60 feet high. A very large crowd were on the streets to witness the test. The pressure could not be put on, as before it could be the water in the cistern was exhausted. The cistern in front of Royster's was filled and this consumed much of the water. The hose proved admirable, but the pressure was not great. The chief engineer

says he wishes to put on 250 pounds, and so will have another in a few days. The Letter Boxes. The letters deposited in the street letter boxes are collected twice a day. The carrier leaves the post office at 5 a. m. and returns at 7, again at 12 m. returning at 2 p. m. The boxes are a great convenience and we are glad to learn that Gov. Holden has applied for

six more. They are not used to them yet, and the ideas of some as to their use are very crude. The reporter heard one party gravely assert that the boxes were put up by the Young Men's Christian Association, for the reception of nickels and other contributions for the poor. Another person said with as much gravity that they were intended to receive petitions to the Legislature. After awhile the good people will know what they are for and will put letters in them instead of walking half a mile to deposit them in the post office. At present two collections are made daily from the boxes, one at 5 a. m., the other at noon. The boxes are a public convenience and should be used, but many of those who mail letters never even know their use, and would be afraid to put

in a letter if they did.

CALENDAR TAKEN UP. The bill amending the law regulating elections, was taken up on its second reading. It proposes to change the time of holding elections to August. Mr. Raynolds, its introducer, favored the question, and the bill was so rebill, saying that the days were longer terred.
in August than in November, and A me more time was then allowed to the people to vote. Mr. Battle said August was the better time. Finally, on motion of Mr. Bizzell, the bill was tabled.

LAYING OFF PUBLIC ROADS. H. B. 15, amending chap. 104, Battle's Revisal, prescribing that the public roads shall be laid off by three commissioners, who are to be specially appointed, instead of a jury of 12 persons, chosen by the Sheriff, as is now the law. The intent of the bill was fully explained by Mr. Vaughan, who said that a great difficulty in the west was in getting the 12 jurors together by the Sheriff. Many roads have been laid out in those counties, by commis-sioners and have proved admirable, while their cost was only one-fourth that of those laid off by the jury system. These commissioners will be chosen specially for their knowledge of such roads, while the jurors are taken just as the Sheriff comes across them. Another provision of the bill repeals the exemption to county officials. These should be made to bear the burden alike with the farmer. They can either work the roads or send a substitute as the former. Mr. Blocker offered a substitute that the magistrates select the road commissioners, but afterwards withdrew it. On motion of Mr. Covington, the bill was not further discussed, but was postponed and made special order for noon on Tuesday, Feb. 4th. H. B. 25, to incorporate the town of

Davidson College. Passed. THE ELECTION OF MAGISTRATES. Under a suspension of the rules Mr. Foard moved to reconsider the vote by which the bill in regard to the elecs tion of Magistrates passed on Saturday. At that time an amendment thae the names of the person-selected by the committee should be voted upon without debate was adopted. Mr. Foard thought there should be no debate, that if any objections were held as to the qualifications of the nominees, those holding them could appear before the committe on nominations and put their case there. This would cause no time to be lost in debates in the House, as the committee could consider all such questions.
The minority might seek by House

debate to delay the election, and con-

sume the time. This bill merely re-

#### Announcement.

A brief introduction of the new man agement of the NEWS is deemed quite sufficient:

The enterprise of the NEWS PUBLISH-ING COMPANY has supplied the popular demand in North Carolina for a cheap daily newspaper. The daily NEWs at \$5 per annum, and the weekly at \$1 per annum are the cheapest newspapers now, or ever before published in the State. This much accomplished, the chief aim of the new management will be to develop the News into a fully equipped ed. newspaper.

To make a newspaper fully abreast with the most progressive journalism will command the unremitting efforts of both editor and proprietors.

The News will advocate a broad State policy of internal improvements. It will know no east, no west, no center, but North Carolina. With the same river, canal and railroad interests of University, every section of the State.

The development of local and general commercial interests will be a feature in the future conduct of the

In its criticism of men and measures the News will be impartial, truthful, earnest, fearless.

The News is no longer the official organ of the Democratic party in North Carolina, but it is, and shall ever be, the fearless tribune of the people and the uncompromising advocate of Democratic principles.

The gross amount of State taxes is \$506,597.37 or about one-third of one per cent on the property. But in the opinion of the best judges the State is worth in cash double the amount stated by the assessors, so if this be true we are really being taxed one sixth of one per cent, which is a cheap price for good government and this we confessedly enjoy. If the Legislature will address itself to the task of perfecting a better system of assessing property the present rate of 38 cents on the \$100, can be reduced without crippling the Administration in its Internal Improvement and Public Education policy. With great hesitation we suggest that the assessors be selected by Senatorial Districts or at prosecuting the survey. least by counties, instead of by town-

Pending the proposition to abolish the office of State Geologist, it may be interesting to note the progress of geological work in other States and countries and the cost of such work.

Ohio has just spent \$100,000 en a ten geologists and chemists, and is now finishing the publication of the results at a cost of \$200,000. Prof. Emmons, in addition to this salary, was allowed to retain his professorship at William College. Ohio pays her Geologists \$9000.

Kentucky pays over \$7000. The average in the United States in about \$4000.

As late as 1874 Georgia established the office of State Geologist and provided for "a mineralogical, geological and physical survey" of the State. In her first report to the Legislature, January 1875, the Geologist stated that it would require ten years to complete the survey.

The law required the survey to be carried on in three sections, known as north, middle and south Georgia, simultaneously beginning at the eastern or western border of the State, and taking each tier of counties in succession.

The last report of the Geologist to the Governor, and submitted by the latter to the Legislature at its late session. showed that ten counties in northwest Georgia had been surveyed and complete and accurate maps of these counties had been made, with a complete cross section from the Alabama line to the Cohutta mountain, on the western lines of Pickens county.

In middle Georgia, eighteen counties, and in southwestern Georgia twenty two counties had been survey-

We are for Retrenchment and Reform too, and wonder how it is that the Senator loses sight of the ten thousand dollars now being taken for per diem by the Legislators is excess of ante-bellum rates! In 1860 on their return from the Whig nominating convention, two distinguished gentlemen from this State met Mr. Seward in Washington, who inquired of them as to what they had done in Baltimore. The old for had of course read all about it in the papers, but his face did not change, when to their answer that they had nominated Mr. Bell, he mumbled "Bell! Bell! what Bell?" Everett is the least bit dyspeptic, and whipping the "Greensboro Ring" in the nomination of Judge Buxton, the Observer thinks, is all in the imagina. tion. The Observer is almost provokingly skeptical. It seems to doubt Mr. Everett's ability to make "Republican politics a grand conflict between brains and principles."

York Snn. At no time in its history has the Christian religion been the subject of such ponderous and stalwart blows as it is meeting to-day. I do not allude to the attacks of the little learned; of men like Thomas Paine and his immitators, who pragmatize from verbal irrelevances to the failure of inspiration. Their arrows have never pricked

the surface of its imperturbability. But the churchmen cannot be unaware that grave and reverent man, philosophers, scientist, and historiog-raphers, men who prove everything and ask nothing of faith or special pleading-are standing up in places and calling on a system that proves nothing, but leaves everything to Faith to give new reason for that Faith; reasons that shall, at least, keep abreast of the discovery, the research and the intellect of the age.

I write as a churchman-as one who however baffled, will surrender no foothold of faith until he sees his Master leave the field. But I would like to ask my fellow churchmen if, inthe teeth of these ouslaughts, the

We are rather inclined to believe that the reason why Gen. No doubt the General thought that by deel ning the offer, he would strengthen his chances for the next Plesidency; but he has so often made private use of Government vessels, both while at the head of the Government and afterward, that no future consideration on his part as to the propriety or expense would alter our people's conviction that he is the only occupant of the Executive chair who has so ruthlessly intruded upon the National Treasury for the benefit of himself and his family. The low price of cotton and every thing that a farmer makes is distress This was once one of the weal thiest counties in the State. everything that we sell is low and taxes and official salaries are higher than ever, considering the enhanced value of money. The radicals in their wildest extravagance did not lay, but 42 cents of State tax on the \$100. The 38 cents we are now paying in view of the increased value of money is a higher tax. This is emphatically not what the Democratic party promised. The people ought not and will not continue to

Senator Graham's bill is good as far as it goes, but it is too lenient. What reason is there that every salary shall not come squarely down to the rate of 1860? There is but one that can be urged and that is that office holders have to live in a better style and dress their families better than in I860. Th people reply. do we live in better style or dress our children as well as in 1860 Shall our official servants dress their

If this thing must be, let the high salaried niggers go and replace them with white men who would gladly get the snug berths with so much pay and so little to do. The people are amazed that the present Legislature has allowed this thing to go on a single day. Then there is \$750 for a Keeper of the Capitol. In 1890 he was paid \$260 and the only servant in the capitol was paid \$180. The public heart is sickened at seeing \$80,000 per annum of their hard earned money spent inside

equally as well as it is now done. It seems some of the lawyers are opposing the reduction of the salary of Superior Court Judges to \$2,000. We had good judges in 1860 at \$1,960, certainly \$2,000 is enough now. If \$2,500 was enough in 1868 when everything was high, surely \$2,000 is as much now as \$2,500 was then. Those who oppose an adjustment of salaries to the 1860 basis are rarely advocates of increased salaries.

Parmaschetti instended to burn him, but a brother proposed that he should be floated upon the Adriatic, that the birds and fishes might eat him alive. This was fishes might eat him alive. This was done. The three brothers were condemned to ten years of imprisonment, with hard labor, but a petition to the king was extensively signed in Venice, asking for their complete pardon.

### New York Star Beams.

George Washington Childs reckons hat some human soul is launched into ternity every second of time, and, wed by the solemn reflection, he keeps forty clocks in his house.

With manifestly unfeline cruelty, the Louisville Courier Journal thus announces the result of the Senatorial contest in Wisconsin: I tumped st last, Wisconsin's doubtful cat Again we'll hear the gentle purr of Matt.

They are true Americans who compose that delegation now tarrying in the city of Mexico. Upon reaching the hotel their first order was for "a

corkscrew and some more spittoons If there is any boundless contiguity is his time to gratify that inclination.

### Silver vs Gold.

Louisville Conrier Journal.

It is a common but ignorant assertion that silver has declined since 1873 The correct statement is that gold has risen—the measure being its purchasing power over elabor and property. Silver, true to its character, has followthe Legislature will heed your counsels and the ebb of the great tide, leaving much good will be done and they be the gold indicator at an abnormal attitude. Since 1872 silver, true to the character, has tellowed the ebb of the great tide, leaving the gold indicator at an abnormal attitude. Since 1872 silver has declined fifteen per cent. as measured by gold, paying 38 cents tax on \$100 worth of but to-day a given quantity of silver will purchase more property and la-bor in England and America than in 1873, while a given quantity of gold

will purchase thirty per cent. more. We will not deny that the contingencies of mining have given partly accidental occasion for these phenomena, but it is also obvious that there is a profound and potential logic in them connected with essential laws. Silver the county in which he lives, as was is the money of the masses, and rest the law in 1860. Then there will be on a vastly broader and more uniform average for the relations of demand and supply. Gold is the money of the capitalist, and is more intimately involved in the great lottery of speculation and investment. Even now the nations which use silver are four times as numerous as those which have an exclusively gold coinage. It is most logical to claim for these considerations that fluctuations can naturaly occur in silver only by slow degrees, and only from causes, which are of the most far reaching and momentous acter that can possibly exist. Also that this character attaches to gold to a much smaller degree, as cotton is a etter index of market influences than eilk, breadstuffs a better index than champague, and coal a better index than diamonds.

### The Death Rate of

Our country is getting to be fearfully alarming, the average of life being lessened every year, without any reas-onable cause, death resulting generally from the most insignificant origin. At this season of the year especially, a cold is such a common thing that in the hurry of every day life we are apt to overlook the dangers attending it and often find too late, that a Fever or Lung trouble has already set in. Thousands lose their lives in this way every winter, while had Boschee's German Syrup been taken, a cure would have resulted, and a large bill from a Doctor been avoided. For all diseases of the Throat and Lungs, Boschee's German Syrup has proven itself to be the greatest discovery of its kind in medicine. Every Druggist in this country will tell you of its wonderful effect. Over 950,000 bottles sold last year without a single failure known.

The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternative with ax; the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful sensation of having left undone something which ought to have been done. A slight, lry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled, his feet are cold or burning, and he complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. This important organ weighs but about three pounds, and all the blood in a living person about three gallons) passes through it at least once every half hour, to have the bile and other impurities strained or filtered from it. Bile is the natural purgative of the bowels, and if the Liver becomes torpid it is not separated from the blood, but carried through the veins to all parts of the system, and in trying to escape through the pores of the skin, causes it to turn yellow or a dirty brown color. The stomach becomes diseased, and Dyspepsia, Indigestion, Constipation, Headache, Biliousness, Jaundice, Chills, Malarial Fevers, Piles, Sick and Sour Stomach, and general debility follow. MERRELL'S HEPATINE, the great vegetable discovery for torpidity, causes the Liver to throw off from one to two ounces of bile each time the blood passes through it, as long as there is an excess of bile; and the effect of even a few doses upon yellow complexion or a brown dirty an excess of bile; and the effect of even a few doses upon yellow complexion or a brown dirty looking skin, will astonish all who try it—they being the first symptoms to disappear. #### DEMANDING THEIR MONEY. Scattered Nation in Council.

By Telegraph to the News. PHILADELPHIA, PA., Jan. 27.—The miners of the Philadelphia and Reading Railroad Company, forwarded to President Gowen, an address demanding payment of their wages of lawful money of the U. S., and threaten if such payment is not made on or before February 16th, they will refuse to

work thereafter.
The sessions of the Grand Lodge of Independent order of Bnai Brith of the U. S. were resumed this morning with a full attendance. The first business was the report of the executive committee of the Constitutional Grand Lodge which was read and adopted. It refers to the statute of religious liberty, erected in 1876 in Fairmount Park, and requests that suitable provision be made for presenting the statute to the people of the U. S. The lodges of the order contributed \$3,153 to the Roumanian mission. The report also recommends an annual collection in every lodge for the benefit of the Universal Alliance Israelite for the elevation of Hebrews in lands where oppressive laws have heretofore

#### National Affairs,

checked their progress.

By Telegraph to the News. WASHINGTON, Jan. 27 .- The Potter Committee commenced investigation of "Cipher telegrams." First witness was Clarence Carey, Attorney of Western Union Telegraph Company, New York. He testified that certain telegrams were placed in his charge at the time proposed and issued subpænas for their production. It was thought that owing to his positive subpæna would not be issued for him. He was subsequently directed by the executive committee to deliver them to Capt. Whitney Washington, Manager of the Western Union. His custody then ended. Floyd Grant was then called. He testified as to the matter of selecting telegrams, said he selected from the trunk those called for by the Morrison committee and the balance were placed in the trunk, the number remaining was 29,275. The telegrams were evenly divided as to party. A number was sent by Z Chandler from Fifth Avenue Hotel, some were signed Havemeye, some Hooper and others Noyes. He thought that Chandlers went to Florida and others to New Orleans and Oregon.

Captain Whitney, the Manager of the Western Union Telegraph at Washington was then sworn. He produced the schedule showing that over three hundred telegrams were delivered to the Morrison emmittee. He thought that Morrison returned despatches but did not recollect the time.

RALEIGH, N. C., Jan. 22, 1879. TO MY FRIENDS AND PATRONS:-The Equitable Life Assurance Society, of New York, than which no Society or Company in America is more reliable for its contracts or offers greater inducements for patronage, has been negotiating with me for some time to take the management of is affairs in North Carolina. I have just returned from New York with a contract mutually satisfactory, and will as soon as practicable visit every county in the State to solicit business and plant Agencies where none exist, and I most earnestly and respectfully invite all persons wanting life policies, or holding policies with which they are dissatisfied, to communicate with me before applying elsewhere, as they can secure a policy through me or my agents on public. The fare is good, the room better terms. The Equitable was or favorable, while the location is very ganized in 1859, has \$35,000,000 assets, convenient. These many advantages its income in 1877 was \$8,500,000 and it has a surplus exceeding all liabilities of \$7,000,000 to back its promises. By its Tontine Plans a handsome income may be secured in this life, besides the provision at death for the assured's dependants. The assured may reside and travel in any part of the United States. P. #### The State Geologist. dence of the News

Prof. Kerr, "the earnest talker" who talks rocks, soils, marls, ores, minerals, &c., has through your columns made his speech to the State Senate, now in session, with the hope of convincing that honorable body that the House of Representatives did a very unwise thing when it passed by 105 to 5 Mr. Foard's bill abolishing the office of State Geologist. And I must say he put his case very adroitly. He said the bill in question not only abolished the office of State Geologist but the survey root and branch. How

Mr. Foard's bill provides the repeal of chap. 2, Battles Revisal, section 14, 15,16 and 17. Section fourteen reads: The Governor shall appoint a suitable person to conduct under the supervision of himself and the board of literature, a geological, mineralogical and agricultura! survey of the State. SEC. 15. The person appointed shall

examine and survey each and every county of the State and ascertain the different geological formations of each county and section of the State; the nature, character and value of its minerals; the nature and character of its soils, and the best mode of improving the same; the nature and kind of its productions; its facilities for manufactories; the extent and value of its water power; the character and value of its botanical productions, the character and value of its timber &c. SEC. 16. The expenditures incurred

by said survey shall not exceed five thousand dollars per annum, &c. SEC. 17. The person making such survey shall deliver lectures upon the subjects committed to his charge in the villages through which he shall pass: Provided he does not thereby delay his other duties.

The General Assembly of 1876-77 passed an act establishing the Department of Agriculture, Immigration and Statistics with a Commissioner as its active head; also a Analyst, Secretary, and any agents the Board of Agriculture deem expedient. Their are twentythree sections of this act prescribing the duties of the lagricultural Department, two of the sections make the Geological Survey a co-operative department, designating its duties as such, while at the same time it occupies the very same ground that the Agricultural Department does. Let us see how this is. Under section seven the Department of Agriculture is charged, first with investigations of sheep husbandry, then diseases of animals, third. ravages of insects, again of drainage and irrigation; and "shall publish circulars of information as to the best methods and formula of both and what surfaces, soil and localities, may be most benefited by such improvements." Section 12 authorizes the employment at Chapel Hill of a chemical analyst by the Department of Agricul-

with the necessary illustrative maps, which shall contain all necessary information as to the mines, minerals, forests, soils, climates, waters, and water powers, fisheries, mountains,

swamps, industries, &c. SEC. 17. The said Department (Agriculture) is authorized and directed to keep in its office in the city of Raleigh wherein shall be recorded (if the owners shallso request) all the farming mineral or other lands offered for sale in this State with a truthful description of the same, and the Department shall be allowed two and one half per cent commission on all sales through it.

These are the duties of the Department of Agriculture, and the ground occupied by it, after the sections of the acts have been stricken out that refer to the 'State Geological Survey" as a

co-ordinate branch. The able Professor complains that the Geologist and the geological survey is by the bill abolished root and branch. Admit it, and yet every department of investigation by which North Carolina can be benefited a

agents, &c. Under this power the Commissioner of Agriculture could order Geological surveys; and certainly no one would object if the Professor will take for his pay, the two and one-half per cent commisions allowed for sales through this Department. And one would suppose there would be no doubt of his ac cepting the duties under these conditions as this commission would be much larger than what he says he would like to take for his salary, "the in-crease of taxation due to the opera-

tions" of State Geologist. The Professor says pass Mr. Foard's bill and there is nothing to merge. Where are all the specimens of mineral, the rich ores, the manuscripts, the fossils that have been the accumulation of twenty-five years? They are in the museum, in the same building occupied by the Department of Agriculture. The bill provides that all the property of the Geological Survey shall be turned over to the Commissioner of Agriculture and put under his contr .1.

### The Value of Pare Wine in Sick-

The chief difficulty with reliable wines has been the recarcity and exorbitant price, but this has been removed by the introduction of a Pure Native Wine, produced from the Oporte grape by Mr. Alfred Spaer, of New Jersey. We understand he has submitted his Wine to the test of many of our celebrated physicians, and all concur in its purity, medical proprieties and superiority to the best imported fort Wine. Most of them prescribe it in cases of debility, affections of the kinneys, and chronic complaints, requiring a tonic, sudorific or diuretic treatment—Praminer. Salesroom 34 Warren street, New York.
